## Career Objective

Aspiring full-stack web developer with a strong foundation in HTML, CSS, Java, and C/C++. Passionate about building real-world projects, learning new technologies, and applying my knowledge to solve practical problems. Dedicated to continuous improvement and building a successful career in software development.

## Technical Skills

- Frontend: HTML, CSS, JAVASCRIPT
- Backend: Java
- Programming: C, C++ (basic)
- Tools: Git, GitHub
- Concepts: Responsive Web Design, Problem Solving

## Projects

### Amazon Clone

Tech Used: HTML, CSS

Developed a fully responsive front-end clone of Amazon using HTML and CSS. Recreated homepage layout, navigation bar, product cards, and footer. Focused on clean design and responsiveness for different screen sizes.

## Port Scanner Tool

Tech Used: C

Built a TCP/UDP port scanner in C that scans multiple ports concurrently using multithreading. Features include version/banner grabbing, CLI interface, and efficient scanning performance. Ideal for security testing and learning low-level networking.

## Number Guessing Game

Tech Used: Java

Created an interactive console-based number guessing game in Java. The program generates a random number and prompts the user to guess, providing feedback on whether the guess is too high or too low. Demonstrates control flow and user input handling.

## Education

EXAM PASSED	BOARD/UNIVERSITY	PASSING YEAR	PERCENTAGE
SECOUNDRY (10TH)	WBBSE	2021	88.28%
H.S (10+2)	WBCHSE	2023	75.4%
Graduation (BCA)	JIS University	pursuing	

## Internships

**CodSoft – Java Development**

**PinnacleLabs - Web Development**

## Languages Known

- English
- Hindi
- Bengali
